

Correction of Second Term Exam

Level 2ASS/ 2 GE

Part One: A/- Reading Interpretation

a- The text is: b- expository

2) - b- How do Chemical Reactions Happen?

3) - a- true b- true c- true d- false

4) a- A shell is electrons surround the nucleus of an atom.

b- A chemical reaction happens when one or more substances changed into other substances.

c- Sodium has eleven electrons.

5) - referring words:

They (§1) = substances it (§1) = process/ chemical reaction

Its (§3) = sodium atom

B/- Text Exploration:

Encircled (§2) = surround stop (§2) = give up

2) - worse ≠ better empty (§3) ≠ full

3) - a-mix- get

b-Will happen- put

c- Will call- fly

4) - Fill in the gaps:

Reaction- mix- element- kinds

5) - Stress

'Chemical- 'chemistry- a'strology- ety'mology- etymo'logical- 'photosynthesis
