### **English evaluation test**

We live in the age of science. Science has brought about a lot of changes in the life of man. It is due to science that man is leading a comfortable and secured life. Technology is very important because **it** is used in all fields of life. Just consider your one day routine and count all the technological products **which** you use in one single day and you will realize the significance.

Artificial satellites, television, computers and robots are **all** gifts of science. Most of the things we use in our life are the result of the inventions of science. Due to science the world has become smaller. Time and distance have been overpowered by science. Man has achieved great success by conquering space. Computer is the latest achievement of our scientists. In medical field also science has brought many changes. X ray machines and other gadgets help the doctors in revealing the inner portion of the body. Science is being applied in the agricultural field. Through science we do not feel heat in summer and cold in winter. We can talk to our friends **who** are at a distance of thousands of kilometers through telephone and computer. But science has also produced deadly weapons for mankind and therefore there is always fear of world war.

#### **Part One: Reading Interpretation (8 pts)**

##### **1) - Say if these sentences are true or false according to the text: (2 pts)**

- a- Science didn't bring changes.
- b- In one day we can use many technological products.
- c- We can't use technology and science in agriculture and medicine.
- d- Science has only good effects.
