SECOND TERM ENGLISH TEST

Text:

It is a common truth today that publicity has a harmful effect on the individual. The aggressivity from advertisements grows threatening in affluent societies. Whenever you are or wherever you go and practically at any moment of the day or night, advertisement is there waiting for you. The street, the home, the office, the school, the stadium, the sky- practically every inch of the earth- is hostile environment, a battlefield where advertisements are constantly offending man's peace.

The Impact of publicity is greater on the poor, deprived people than on the average working class family. **The first** are in need of almost every kind of modern comfort, consumption goods, travels and to mention a few of **their** unsatisfied necessities. **The latter**, on the other hand do not at all escape the negative effects of publicity. They are the victims, too. **They** are the slaves of fashion, new products and consumer goods and can not live without them.

However, at this level, mainly when the poor deprived categories of society are in real need, the temptation grows stronger and stronger and if it is not checked, it becomes a titanic task to resist it mainly when the family and other social institutions are missing.
