The term “obese” describes a person who is very overweight, with a lot of body fat. Obesity, which is a common problem in the UK, is estimated to affect around one in every four adults and around one in every five children. For many people, modern living involves eating excessive amounts of cheap, high-calorie food and spending a lot of time sitting down at desks, on sofas or in cars.

It is very important to take steps to tackle obesity because, as well as causing obvious physical changes, it can lead to a number of serious and potentially life-threatening conditions, such as type 2 diabetes, heart disease and some types of cancer like breast cancer. It may also affect the quality of life and lead to psychological problems such as depression and low self-esteem.

The best way to treat obesity is to eat a healthy, reduced-calorie diet, eat slowly and avoid situations where to overeat. In addition, sport should be practised regularly.

If you believe that children are our future, you have the power to educate them to change a corrupt society. To teach children the values they need to be conscientious young leaders, you have to help them develop awareness and the ability to think outside the box.

Teach your child responsibility. If he has made a mistake, he needs to learn to admit that he did something wrong, and to apologize for it. Teach your child that cheating is wrong and inexcusable under any circumstances. Tell your child that being honest is the only way to succeed.

Make sure your child develops an internal moral code. Do not just make him follow rules because that is the best way to avoid trouble. Your child should be given moral values to be ready to defeat negative behaviour and illegal acts to build a society based on justice, morality, honesty and loyalty.
